

PRINCE JAIN

AWS Cloud Engineer & DevOps

+91-8077498841 | princejain1102@gmail.com | www.linkedin.com/in/1102prince-jain | Jaipur, Rajasthan

PROFESSIONAL SUMMARY

AWS-focused Cloud & DevOps Engineer with hands-on experience designing and deploying cloud-native solutions on AWS and GCP. Proficient in Python scripting, CI/CD pipeline automation, and containerization using Docker and Kubernetes. Experienced in building and serverless architectures, managing EC2 instances, configuring Linux environments, and implementing cloud security best practices. Passionate about automation, monitoring, and optimizing scalable cloud infrastructure to deliver reliable, high-performance systems.

TECHNICAL SKILLS

AWS Services: EC2, S3, Lambda, IAM, VPC, CloudWatch, RDS/Aurora, DynamoDB, SQS, AWS Config, AWS CDK

Cloud & DevOps: GCP, Docker, Kubernetes, Serverless Architecture, CI/CD Pipelines, Linux

Automation: Terraform, AWS CDK (Python)

CI/CD & Source Control: GitHub, Jenkins, Git

Programming: Python, C, HTML, CSS

Databases: MySQL, RDS/Aurora (backup, snapshot & lifecycle management)

Core Concepts: Data Structures & Algorithms

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Google Cloud Career Launchpad – Cloud Engineer Track
- HackerRank – Python Basic & SQL Basic
- NPTEL – Technical English for Engineers (2024)

PROJECTS

CI/CD Pipeline – Dockerized Application Deployment on AWS EC2 | 2025

Tech Stack: AWS EC2, Docker, Jenkins, GitHub, Linux, Shell Scripting

- Designed and deployed a containerized web application using Docker on an AWS EC2 Linux instance, following cloud infrastructure and deployment best practices.
- Implemented an automated CI/CD pipeline using Jenkins with GitHub integration, enabling automatic build, Docker image creation, and deployment whenever new code was pushed.
- Automated Docker image building, tagging, and deployment workflows using shell scripts, reducing manual deployment efforts and ensuring consistent application environments.
- Configured AWS EC2 instance to automatically pull the latest Docker image from the repository and restart containers, enabling continuous delivery and zero-touch deployment.
- Managed AWS EC2 infrastructure including instance configuration, Security Groups, networking, IAM access permissions, and Linux server administration following AWS security best practices.

PyBuddy – AI-Powered Python Programming Chatbot | 2024

Tech Stack: Python · NLTK · TensorFlow · HTML · CSS

- Developed an AI-powered chatbot application using Python and NLP (NLTK & TensorFlow), implementing real-time query processing and automated response generation pipelines.
- Designed and implemented Python automation scripts for chatbot training, model optimization, and response validation, improving reliability across diverse query types.
- Built an interactive self-assessment quiz module with automated scoring logic, demonstrating proficiency in Python scripting and application logic automation.
- Awarded 2nd place among 220 teams at an inter-college project expo for technical innovation and implementation quality.

EDUCATION

B.Tech – Computer Science & Engineering | CGPA: 7.13

Poornima University, Jaipur | 2023 – 2027

Senior Secondary (Class XII) | 56.2%

SKD Public School, Fatehabad, Agra | 2023

Secondary (Class X) | 61.2%

John Milton Public School, Agra | 2021

ACHIEVEMENTS

- Prayogam 2024: Secured 2nd place for a real-time data processing project built with Python, competing against 220+ teams.
- LeetCode: Solved 50+ DSA problems, demonstrating strong problem-solving and algorithmic thinking skills.
- HackerRank: Achieved 3-Star rating in both Python and SQL, validating proficiency in programming and database querying.
